Abstract

This is a template in L^AT_EX format for your abstract paper. The abstract should not have equations, and must not have references. The length of the abstract must not exceed *ONE* page (title, author names and affiliations, and keywords included). It should clearly summarize your work, giving the objectives and output of the project, so that the readers could evaluate its suitability if needed. *If the work is to be presented by Richard K. Anderson, for example, the abstract file must be named anderson!rk.tex. (Notice the mandatory exclamation mark '!')* Please see comments in the source tex file. For more details of the format. Look for the symbol *** in the same .tex file to make sure you have supplied all needed information in your abstract file.

Keywords: keyword1, keyword2, keyword3, keyword4, keyword5, keyword6.
(List up to 6 keywords, without capitalization and without boldface font. Please separate each keyword using a comma.)
